

Treat Lyme Disease Now!

According to the Center for Disease Control Division of Vector-Borne Infectious Diseases, between 1993 and 2005, there were 1,036 confirmed cases of Lyme disease reported in North Carolina. If left untreated, individuals with Lyme Disease can end up with serious complications including arthritis in the large joints, nervous system problems, and irregularities of the heart rhythm. Early detection and treatment is key to fighting this disease. Join Dr. Pittman as he discusses how Hyperbaric Oxygen Therapy can effectively treat chronic Lyme Disease and how extending hyperbaric treatments may relieve symptoms permanently.
